PROFILE

Software Engineering student at Universitas Gadjah Mada (GPA 3.78/4.00) with hands-on experience in project management and quality assurance. Proven track record delivering end-to-end projects across health-tech, agritech, and academic systems. Skilled in stakeholder management, requirements documentation, UAT, and cross-functional team coordination.

EDUCATION

Universitas Gadjah Mada (UGM) July 2024 – Present
Bachelor of Applied Science, Software Engineering | Yogyakarta, Indonesia | GPA: 3.78 / 4.00

PROJECT & ORGANIZATIONAL EXPERIENCE

Project Manager | Tentang Dental Application February 2026 – Present
Independent Project – Dental X-Ray & Clinic Mobile App (Ongoing)

- Manage end-to-end delivery of a health-tech mobile application for dental clinic registration, appointment booking, and X-ray services.
- Facilitate stakeholder meetings to gather requirements, define project scope, and align product direction with clinic management.
- Produce full project documentation including SRS, User Manual, UAT plan, test cases, and project timeline.
- Delegate tasks across UI/UX, frontend, and backend team members; track milestones and ensure timely delivery.

Hustler / Project Manager | Panen In (Farming App) December 2025 – Present
Independent Project – Smart Agriculture Mobile Application

- Identify core user problems, define strategic solutions, and establish business KPIs for a farmer-focused mobile ecosystem.
- Lead ideation, business model design, and product roadmap planning across a cross-functional engineering team.
- Coordinate stakeholder communication and manage project timelines using Agile principles.

Project Manager | Academic Information System (AIS) August 2025 – November 2025
Universitas Global Nusantara

- Led cross-functional team of 3 (UI/UX, Frontend, Backend) through full project management lifecycle for a university academic system.
- Owned product planning and comprehensive documentation, including Business Requirements, MVP definition, and SRS.
- Designed system architecture using C4 Diagrams, UML Use Case, and Activity Diagrams to guide technical execution.
- Tracked project milestones and team progress through systematic Weekly Reports.

Project Manager Job Simulation | Siemens Mobility 2026
Forage Job Simulation

- Completed simulation focused on project KPI formulation and development infrastructure setup.
- Created project tracker and analyzed spreadsheet data to build management dashboards for stakeholder reporting.

Hustler | Google Developer Groups on Campus (GDGoC) UGM February 2026 – Present
Team-Forming Kick-Off & Mini Hackathon

- Participated in 'Bridge the Gap: Mini Hackathon - Tech for Social Impact' to build a working prototype with a 3-member team (Hustler, Hipster, Hacker).
- Conducted user validation, mapped problem landscapes, and formulated solutions under tight deadline constraints.

Secretary | KOMATIK UGM January 2025 – Present
Komunitas Mahasiswa Teknologi Informasi dan Komunikasi

- Draft institutional administrative letters, funding proposals, room permits, and official accountability sheets.
- Manage incoming and outgoing organizational data pipelines to support large-scale community events.

- Sub-Coordinator PSDM Division | Penalaran Center Community (PCC) SV UGM**

January 2025 – Present
- Coordinate community expansion, run internal evaluation meetings, and act as deputy to the Division Head in operational boards.
 - Managed the internal distribution, uniform design procurement, and budget tracking for all community active members.

Secretary | ASSETS UGM

January 2025 – Present

Association of Software Engineering Technology Students

- Organize executive board scheduling, manage meeting minutes, and structure central archive systems for the student union.

Publication & Field Research Team | Lecturer's Community Service Project

August 2025 – November 2025

Department of Electrical Engineering and Informatics, SV UGM

- Conducted direct field surveys and structured interviews with local business owners; processed data into primary content for a promotional video.

EVENTS & ACTIVITIES

Script Writer | PALPOD UGM Podcast

September 2024 – December 2025

Researched and wrote episode scripts; collaborated with hosts on theme development and creative direction.

Head of Committee | PCC First Gathering, Penalaran Center Community

April 2025 – May 2025

Led end-to-end planning and execution for 50+ attendees including rundown, MC scripts, and feedback analysis.

Secretary | SERIES – Software Engineering Oriented Study

August 2025 – September 2025

Managed TOR, official letters, monitoring documents, and meeting minutes for the major's orientation program.

Event Staff | PCC Road to Mapres, Penalaran Center Community

November 2025 – December 2025

Defined event themes, drafted talk show questions, and served as technical and visual operator.

Security Staff | Tech Enthusiast Day 2024, KM DTEDI SV UGM

September 2024 – November 2024

Maintained safe event environment and assisted with crowd management at national-scale technology competition.

SKILLS & COMPETENCIES

Languages:	Bahasa Indonesia (Native), English (Intermediate)
Project Management:	JIRA, Notion, Google Workspace, Microsoft Excel, Microsoft Office, Canva, Stakeholder Management, Agile/Scrum
Programming:	Python, HTML, CSS, JavaScript, PHP, React Native, Laravel, Next.js, Flutter, Supabase, PostgreSQL, MySQL Replication
Testing & QA:	Appium, Cucumber (BDD), Maven, UAT (User Acceptance Testing), Selenium, React Native Testing
Soft Skills:	Leadership, Team Collaboration, Problem-Solving, Time Management, Communication
